SUMMARY

Backend Java engineer with **2+ years** at Accenture's Fortune 500 insurance practice — **promoted to Analyst in 2 years** — shipped 14 Java 21 / Spring Boot microservices, led two platform re-architectures, and provisioned an event-driven AWS runtime (SQS FIFO, ECS Fargate, S3, API Gateway) in Terraform. Strong in REST API development and SQL performance — profiled a critical timeout from **3+ minutes to under 60 seconds**. Holds **80%+ test coverage** and owns defects end to end.

TECHNICAL SKILLS

Languages & Frameworks: Java 21, Spring Boot 4, Spring MVC, Spring JDBC, Spring Data JPA, Spring Security, SQL
APIs & Architecture: REST API Design, Microservices, Event-Driven Architecture, SOAP / JAX-WS / Apache CXF / JAXB, Async Processing & Thread Pools, Backward-Compatible Service Contracts
Databases & Performance: Oracle DB, Oracle UCP Connection Pooling, Data Modeling, Indexing, Query Tuning, Pagination, Joins, Endpoint Profiling
Cloud & Messaging: AWS (SQS FIFO, EventBridge, S3, ECS, ECR), Dead Letter Queues, Claim-Check Pattern, Docker, Terraform
Testing & Reliability: JUnit 5, Mockito, Integration Testing, Global Exception Handling, Defect Triage, Root-Cause Analysis, Splunk
Tooling & Practices: Git, GitHub, Jenkins, Maven, CI/CD, SAgile (PI Planning, Iteration Planning), Code Reviews

PROFESSIONAL EXPERIENCE

Packaged App Development Analyst — Backend Java Developer

Accenture, Hyderabad, India | Client: Fortune 500 US insurer | Jun 2026 – Present

- Built a Group Benefits event and acknowledgement API on Java 21 / Spring Boot — **230 files and 46K lines** — decommissioning IBM MQ outbound dispatch, rebuilding data access on Spring JDBC over an Oracle UCP pool, and replacing a legacy Ant / Spring Batch bootstrap with an executable JAR.
- Delivered a 26-operation Group Benefits SOAP service on Spring Boot 4 / Apache CXF / Java 21 — keeping the published WSDL byte-for-byte identical (SHA-256 verified) through the javax → jakarta migration, across three Oracle UCP datasources with explicit transaction boundaries.
- Hardened the service surface across 26+ SOAP operations with a global exception handler emitting structured, correlation-tagged errors, and a bounded async executor (10 core / 18 max threads, 200-task queue) for event processing.
- Provisioned the AWS runtime and event-integration platform in Terraform: private API Gateway → VPC Link → internal ALB → ECS Fargate, SQS FIFO with a 5-attempt redrive to a 14-day dead letter queue, and 3 Python Lambdas for S3 claim-check read/write/delete under least-privilege IAM.
- Built a GenAI defect-triage agent that reads recurring defect patterns across UI, API and PL/SQL code and drafts root-cause summaries — cutting triage time from **~1 day to minutes** across **25+ recurring defects**, behind a mandatory human review gate.

Associate Software Engineer

Accenture, Hyderabad, India | Client: Fortune 500 US insurer | May 2024 – Jun 2026

- Profiled a slow endpoint behind production gateway timeouts, traced it to unbounded result sets, and rebuilt the query path with pagination and indexed lookups — taking a business-critical flow from **3+ minutes to under 60 seconds (70% faster)**.
- Built the data access layer on Spring JDBC against Oracle DB, tuning SQL with joins, pagination and indexed access paths. Response times on frequently used APIs came down **20–40%**.
- Migrated a legacy Oracle Forms case management platform to Java microservices — 5 experience-layer and 9 domain-layer services — rewriting legacy business rules as testable Spring Boot service layers.
- Standardized error handling with a global exception handler, custom exceptions and consistent HTTP status mapping; recurring QA defects and integration failures dropped **20–30%**.
- Resolved **30+ high-severity production defects** end to end — reproduced from the UI, isolated via HAR traces, debugged the service layer, and drove root-cause analysis to a fix — each within **1 business day**.

EDUCATION & CERTIFICATION

B.Tech, Computer Science and Engineering — Avanthi Institute of Engineering & Technology, Bhogapuram | Aug 2019 – May 2023

AWS Certified Cloud Practitioner — Amazon Web Services | 2026
